Lamp Accessories

1

Caphook

Headstrap

Caphookstrap =
1 Headstrap + 4 Caphooks

Headstrap

2

A Headstrap is used to wear a LEDEX Headlamp over a cap or directly on the head.

Caphook

3

LEDEX Caphooks securely hold the headstrap onto any hardhat. This enables a wide variety of Caplamps to be worn on a hardhat securely.

Caphookstrap - 1

4

A LEDEX Caphookstrap can be used to wear any miner's caplamp on a hardhat. This is particularly helpful where a Caplamp is only used periodically, and a hardhat is preferred use. The caplamp fits into the Lamp Bracket on the front of the strap, while Four Cap Hooks hold the strap firmly onto the hardhat.

Caphookstrap - 2

5

A Caphookstrap can be used to wear any LEDEX caplamp on a hardhat including the Ledex LC 8 traditional caplamp and any of our cordless caplamps.
