

Dual-Mode Portable Safety Lamps

KS2D-XYf

This product series is a very convenient portable lamp series with a rechargeable battery and LED lights. They are widely used in mining and other industries for safety of person or environment and for state indication of equipment. It can be quickly mounted somewhere or easily worn on your helmet. Four models are available for different pattern options. They are all in the same enclosure and structure. Every one has two operating modes for different LED loads, different colours and different illumination patterns.
